COMPONENT PROCESSING

Large, small and difficult to place parts are easy to tape with V-TEK's TM-50XL. The microprocessor-controlled sealer and stepper motor drive assure precise handling of all taping parameters. Several advance speeds are selectable to accommodate problem parts and to minimize part jumping.

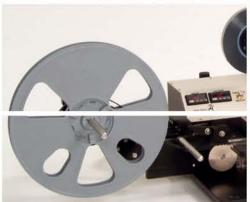

Flexible, easy to use, menu driven software and advanced electronic characteristics make the TM-50XL a perfect choice for integration into manufacturing processes with existing Pick and Place capabilities.

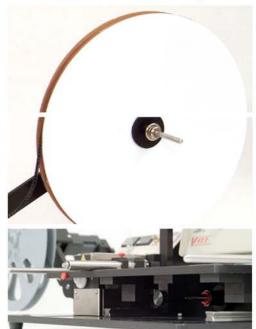

In addition to its electronics flexibility, the TM-50XL offers V-TEK's innovative setup and changeover design, allowing any taping operator to change over carrier and cover tapes in minutes.

- Sturdy adjustable track assembly for large tape widths up to 120 mm
- Preset track widths with fine-tune adjustment
- Heavy duty take-up assembly for take-up reels up to 120 mm
- Dual stage fully adjustable Heat and PSA sealer assembly
- User-friendly software allows features such as: Multiple job storage and recall
 - Part mark and vision integration
 - Sensor monitoring capabilities
 - Automatic leader/trailer
- Dimensions: height 15" (38 cm) width 55" (140 cm) depth 20.5" (52 cm)
- Power required: 120/230 VAC, 50/60 Hz Compressed air: 80 PSI
